

In May we have finished reading Holes and embarked upon a new novel, Goodnight Mr Tom, which is about a young boy evacuated from London to the countryside at the start of the Second World War. This has led to activities based on different types of evidence surviving from this period. In Maths we have completed workbook 6B and have begun working on investigations and revision. Our Science has focused on chemistry. In IPC we have been looking at earthquakes, designing earthquake-proof buildings and preparing emergency disaster kits. We also enjoyed a highly informative and interesting visit to the particle accelerator at QST, followed by a science workshop.
