

Safari Class

March 2023

In Literacy we finished looking at our book `Stick Man` and did some work on using adjectives and prepositions to describe a scene and the people within it. We also looked at rhyming words, sorting the words which rhymed and making some silly rhymes about animals!

In Mathematics our major focus was introducing and understanding multiplication, with some quickfire practice on the ipad helping to learn the 2x table off by heart!

In IPC we've finished up our Treasure islands unit by looking at how to put key events on a historical timeline (including our own arrival into the world!), what some countries traded during pirate times and the dangerous sailing routes they took across the seas (watch out for pirates!)

We also looked at the movement of the sun, moon and earth and made small plasticine models to represent the orbits and rotation.

We also made yummy drinks using some ingredients you'd find on different islands from around the world. Our school friends enjoyed our "Bear's favourite Berry Drink" which had milk, blueberries, mixed red berries and a little bit of vanilla ice cream. Delicious!
