

Safari Class

May 2023

This month we've been practising a lot for Sports Day at Obuchi yet have still found the time for lots of exciting learning!

In Literacy we read the book 'Man on the Moon' by Simon Bartram, a fun (and slightly silly) book which we have used to help inspire our Postcard and Instruction text writing. Our recipe-writing also gave us a good excuse to go into the kitchen and make some delicious moon biscuits!

We had a very 'Science-based' month in IPC as we began our Pushes and Pulls forces unit. As you can see from our photographs, we carried out lots of fun investigations into gravity, friction, air resistance, magnetism and buoyancy! This was bolstered by an exciting field trip to the QST particle beam accelerator!

In Maths we've been working on measuring with units of length and mass and answering longer word problems applying the four operations to measurement. We've also made huge steps in our column addition skills and applying addition and subtraction into different contexts.
