

 **Snow
MONKEY**
YEAR 3 CLASS

IPC has been very exciting in May. We have designed models of earthquake proof buildings and tested them to see how much they would shake in an Earthquake. We have learned about why earthquakes occur and designed our own Earthquake survival kits.

In *Literacy* we have begun a unit on non-chronological reports, focusing on the features of reviews. We have been identifying headings, sub-headings, bullet points and paragraphs of sample game reviews.

In *Mathematics* we have been working on multiplying three numbers, multiples of ten, multiplying with carrying and adding.

VISIT AT 

The highlight of May has to be our trip to the Nuclear Fusion research centre, where we were given a guided tour and participated in some very exciting science experiments.
